Assignment 0311 Feedback

Carlos Agudo   *r2d32 / carlos.jorrillo@gmail.com*

1a — One can never issue too many commands **:)** (**+**)

1b — You transcribed your activity to a degree, but your record does not appear to be complete—where were the *non-empty1* and *non-empty2* files created? You make reference to a *text.txt* but this is not seen in your transcription. So overall I don't get a complete sense of what you did here. (**/**)

2e — You performed some degree of byte-level navigation, but there are enough inconsistencies in your report to cast doubt on how much you truly understood this. In some cases, it is easy to just jump to conclusions because a data block has recognizable data. (**/**)

4d — You were able to use the information presented to a degree, but assorted glitches in your bit-level navigation show that you didn't use that information in full. (**|**)

4e — Commit frequency is appropriate for the work done, but messages have some not-so-descriptive repeats. (**|**)

4f — Disk image submitted 4 days after the due date; additional deliverables submitted the next day. (**|**)
